**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-4 is/are pending in the application.
  - 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-4 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 11/17/2003 is/are: a) accepted or b) objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) All    b) Some \* c) None of:
    1. Certified copies of the priority documents have been received.
    2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected as being indefinite because following the steps of the method of claim 1 will not necessarily result in an elliptical outline. It is unclear as to how one would "establish a first fixed point outside the elliptical structure" in the first step of claim 1, when the method is directed to designing the elliptical structure. It is unclear as to what is meant by "the farthest endpoint of the minor axis through the intersecting point of the major axis and the minor axis." Since these points are arbitrary and since no "drawing" implement is claimed, it is unclear from the claim language how an elliptical structure would be drawn.

Claim 3 is rejected based on its dependency on rejected claim 1.

Claim 2 is rejected as being indefinite because following the steps of the method of claim 2 will not necessarily result in an elliptical outline. It is unclear as to how one would "establish a first fixed point outside the elliptical structure" in the first step of claim 2, when the method is directed to designing the elliptical structure. It is unclear as to what is meant by "the farthest endpoint of the minor axis through the intersecting point of the major axis and the minor axis." It is unclear as to what is meant by an "arbitrary angle" since an arbitrary angle could be any angle from 0 to 360 degrees. Since these points and angles are arbitrary and since no "drawing"

implement is claimed, it is unclear from the claim language how an elliptical structure would be drawn.

Claim 4 is rejected based on its dependency on rejected claim 2.

For purposes of prosecution, Examiner interprets claims 1-4 to be an approximation of an ellipse using arcs of circles.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Langelaan (U. S. Patent No. 5,870,106).

Langelaan teaches a method for designing an elliptical structure which is symmetrical about the major axis and the minor axis thereof, and has an outline of an approximate elliptic curve, comprising the steps of: approximating the shape of the elliptical curve using successive arcs of segmented circles (Col 1, line 50-Col 2, line 62).

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents and applications disclose elliptical structures Sims (U. S. Patent No. 6,415,518), Lopez (U. S. Patent No. 6,192,634), Knight (U. S. Patent No. 4,665,664),
